SUMMARY

Highly skilled Data Analyst and Engineer with 3+ years of enterprise experience designing, building, and optimizing scalable cloud data pipelines and ETL solutions across Amazon, Global Payments, and Vanguard. Proven track record of improving processing reliability by up to 30% and slashing data anomalies by 50%. Proficient in AWS (Glue, Redshift, Lambda), Snowflake, dbt, Apache Spark, and Azure Data Factory to deliver secure, high-throughput analytics.

CORE COMPETENCIES

Data Engineering & ETL Pipelines | Cloud Data Warehousing (Redshift, Snowflake) | AWS & Azure Cloud Architecture | Data Quality & Anomaly Detection | Real-Time Streaming (Kafka) | Machine Learning & LLM Workflows | Cross-Functional Technical Collaboration.

TECHNICAL SKILLS

- **Languages:** Python, SQL
- **Cloud & Data Platforms:** AWS (Glue, Redshift, Lambda, Athena, Data Pipeline), Azure Data Factory, Azure Fabric, Informatica
- **Big Data & Streaming:** Apache Spark (PySpark), Apache Kafka, Hadoop, MongoDB, PostgreSQL, SQL Server
- **Modern Data Stack & DevOps:** dbt, Snowflake, Docker, REST APIs
- **BI & Visualization:** Tableau, Power BI, Matplotlib, Seaborn
- **Machine Learning & GenAI:** Scikit-Learn, PyTorch, TensorFlow, LangChain, RAG Pipelines, Hugging Face

WORK EXPERIENCE

DATA ANALYTICS ENGINEER — Global Payments, Atlanta, GA (Contract)

March 2024 – January 2026

- Analyzed transaction patterns across payment channels to optimize payment processing efficiency using Python and SQL.
- Developed and maintained Tableau dashboards for real-time tracking of key payment metrics across operations and risk management teams.
- Supported fraud detection initiatives by analyzing historical data to identify anomalies, improving model accuracy and reducing false positives by 15%.
- Refined ETL pipelines in collaboration with data engineers using AWS Redshift and Informatica, ensuring seamless data integration.
- Implemented rigorous data quality validation frameworks, reducing data anomalies by 40% and ensuring strict compliance with regulatory standards.

DATA ENGINEER — Amazon, Seattle, WA (Contract)

September 2023 – January 2024

- Spearheaded enhancements to data pipelines using AWS Glue and Informatica, achieving a 30% improvement in processing reliability and scalability.
- Automated ETL workflows with AWS Data Pipeline, reducing manual effort and increasing efficiency by 25%, ensuring timely data delivery.
- Conducted robust data quality checks with Python and AWS Redshift, reducing data anomalies by 50% for high-quality downstream analytics.
- Integrated REST APIs with AWS services to enable seamless data extraction and accessibility across business analytics teams.
- Optimized SQL-based data mapping using AWS Athena, ensuring precise and timely month-end financial and operational reporting.

DATA ANALYST — Vanguard, Malvern, PA (Contract)

July 2022 – December 2022

- Optimized Tableau dashboards connected to SQL Server and PostgreSQL, driving real-time KPI monitoring and boosting operational efficiency by 15%.
- Enhanced reporting capabilities by developing supplemental Power BI solutions to augment complex Tableau financial insights.
- Managed Azure Data Factory pipelines, ensuring seamless and accurate data flows for real-time dashboard updates.
- Coordinated Azure Fabric and REST API integration, enabling seamless cross-platform data flow and supporting dynamic reporting needs.

Real-time Number Plate Detection System

August 2021 – May 2023

- Built custom object detection pipeline leveraging YOLO-based Convolutional Neural Networks and OpenCV.
- Extracted plate numbers with 95% accuracy in real-time camera feeds, drastically reducing manual enforcement intervention.
- Trained model in Google Colab environment using PyTorch and TensorFlow with custom image augmentation techniques.

Chicago Crime Analytics & Prediction

August 2021 – May 2023

- Processed multi-gigabyte historical crime datasets using Python, Pandas, and NumPy.
- Trained spatial-temporal machine learning models using Scikit-Learn algorithms (Random Forests, XGBoost).
- Delivered interactive Tableau visualization tool enabling tactical police unit deployment, directly contributing to a 12% crime drop in targeted zones.

Real-Time Credit Card Fraud Detection

August 2021 – May 2023

- Engineered real-time message streaming with Apache Kafka for microsecond transaction payload ingestion.
- Deployed event-driven anomaly detection models on AWS Lambda, storing clean event streams in MongoDB.
- Improved fraud detection accuracy by 25%, significantly cutting financial loss and false positive customer blocks.

EDUCATION

University of Maryland Baltimore County (UMBC) – Baltimore, MD | Master of Professional Studies in Data Science

May 2023

Amity University of Rajasthan – Jaipur, India | Bachelor of Science in Technology

May 2021

CERTIFICATIONS

- AWS Certified Associate Data Engineer – Amazon Web Services (AWS) (Certified)
- Academy Accreditation – Generative AI Fundamentals – Databricks (Accredited)
- Introduction to Career Skills in Data Analytics – LinkedIn (Completed)
- Salesforce Administrator – Salesforce (Certified)
- Execute and Evaluate Hugging Face AI Models – Hugging Face / DeepLearning.AI (Certified)
- Build LLM Evaluation Applications with LangChain – LangChain / DeepLearning.AI (Certified)
